USER INTERFACE DESIGN EXP: 8

Create storyboards to represent the user flow for a mobile app using Balsamiq

V SAIPRASHANTH 240701457

AIM:

The aim is to create storyboards representing the user flow for a mobile shopping application (fashion e-commerce app) using Balsamiq.

PROCEDURE:

Tool Link:

https://balsamiq.com/

Step 1: Define the User Flow

1. Identify Key Screens:

List the main screens of the application:

- Splash Screen
- Home Screen
- Product Listing Screen
- Product Detail Screen
- Shopping Bag (Cart) Screen
- Order Confirmation Screen

2. Map the User Journey:

Understand how the user navigates through the app:

- User opens the app → Splash Screen
- Lands on Home Screen → browses products

- Selects a product → views Product Details
- Adds item to bag → goes to Shopping Bag
- Proceeds to checkout → places order
- Views Order Confirmation

Step 2: Create Storyboards Using Balsamiq

1. Install Balsamiq:

Download and install Balsamiq from the official website.

2. Create a New Project:

Open Balsamiq and create a new wireframe project.

3. Add Wireframe Screens:

Use the “+” option to create multiple screens for each stage of the app.

4. Design Each Screen:

- Use UI components like buttons, icons, images, and text.
- Keep the design simple and user-friendly.

5. Organize the Flow:

- Arrange screens in logical order.
- Connect screens using arrows to show navigation flow.

Example Screens for Fashion Shopping App

1. Splash Screen:

- Displays app logo (brand symbol)
- Acts as loading/entry screen

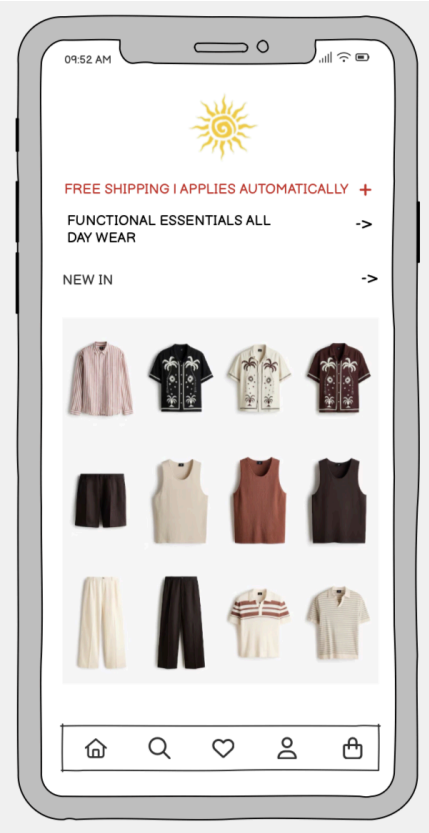
---

2. Home Screen:

- Displays featured products or categories (e.g., Men, New Arrivals)
- Navigation bar (Home, Search, Wishlist, Profile, Cart)
- Promotional banners (e.g., Free Shipping)

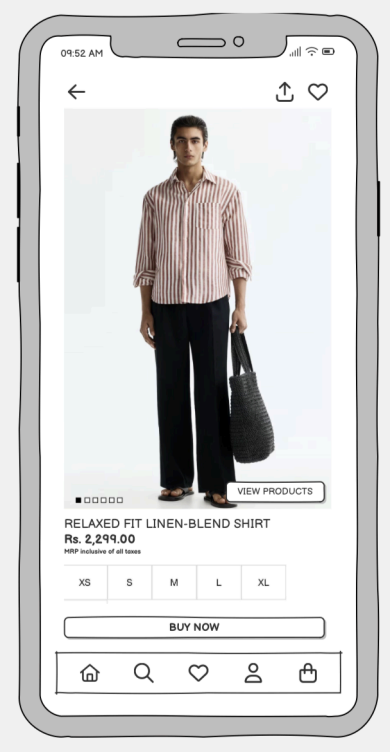
3. Product Listing Screen:

- Shows multiple products in grid format
- Includes product images, names, and prices
- Allows browsing different items



4. Product Detail Screen:

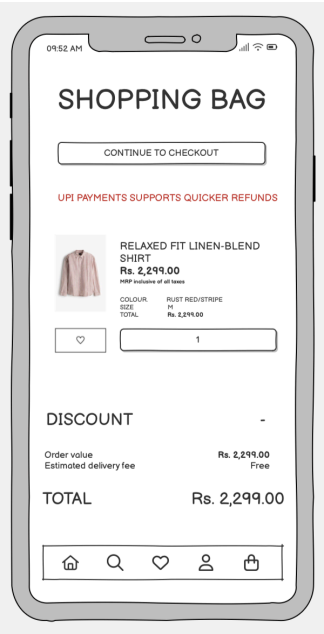
- Displays selected product in detail
- Includes:
    - Product image
    - Price
    - Size options (S, M, L, XL)
    - “Buy Now” button



---

5. Shopping Bag (Cart) Screen:

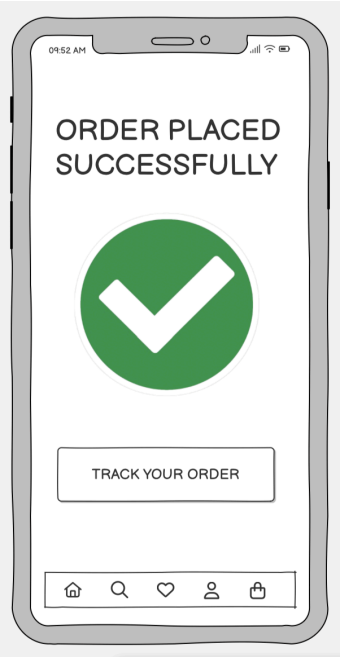
- Shows selected items
- Displays:
    - Product name
    - Quantity
    - Price
- Includes:
    - Total amount
    - “Continue to Checkout” button



---

6. Order Confirmation Screen:

- Displays success message: “Order Placed Successfully”
- Shows confirmation icon (tick mark)
- Includes “Track Your Order” option



Example Output:

Splash Screen

- App logo is displayed while loading

Home Screen

- Product categories and featured items are shown
- Navigation options available

Product Listing Screen

- Grid of products with images and prices

Product Detail Screen

- Detailed view of selected product
- Option to select size and purchase

Shopping Bag Screen

- Displays selected items and total price
- Checkout option available

Order Confirmation Screen

- Shows successful order placement
- Option to track order

RESULT:

Thus, the storyboard representing the user flow for a mobile shopping application was successfully created using Balsamiq. The designed screens clearly illustrate the complete user journey, including product browsing, selection, adding items to the cart, checkout process, and order confirmation. The storyboard helps in understanding the app structure, navigation flow, and user interaction effectively.
