USER INTERFACE DESIGN EXP: 7

Experiment with different layouts and color schemes for an app. Collect user feedback on aesthetics and usability using GIMP(GNU Image Manipulation Program (GIMP)

V SAIPRASHANTH 240701457

AIM:

To design and compare different mobile app login screen layouts with multiple colour themes and evaluate user feedback on aesthetics, usability, and readability using GIMP.

PROCEDURE:

Step 1: Install GIMP
• Download and install GIMP from the official website.

Step 2: Create a New Project
• Open GIMP
• Set Canvas Size: **1080 × 1920 pixels** (mobile screen size)

Step 3: Design Base Layout

1. **Divide Sections:**
   • Header (Welcome text)
   • Input fields (Username & Password)
   • Button section (Sign in)
   • Footer (Sign up option)
2. **Add UI Elements:**
   • Text Tool: "Welcome back", labels, button text
   • Shape Tool: Rounded rectangles for input fields and buttons
   • Placeholder text: “enter your username”, “enter your password”
3. **Layer Organization:**
   • Header Text
   • Input Fields
   • Button
   • Background
   • Footer Text

Step 4: Create Colour Variants
• Duplicate the layout and create 3 different designs:

- **Layout 1 (Red Theme):**
  • Red background
  • White input fields and text
  • High contrast design
- **Layout 2 (Blue Theme):**
  • Blue background
  • Dark blue input fields
  • Soft modern UI appearance
- **Layout 3 (Light Theme):**
  • Light grey background
  • Dark text with blue button
  • Minimal and clean design

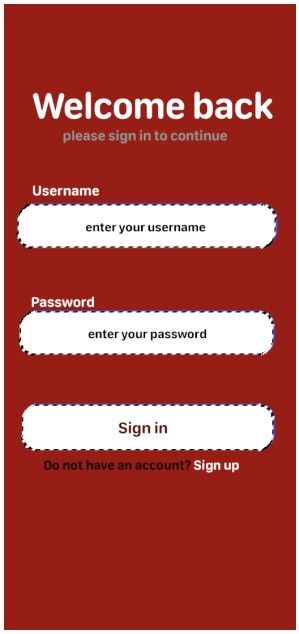
• Export as:
• Layout1.png
• Layout2.png
• Layout3.png

Step 5: Collecting User Feedback
• Shared all three layouts with users
• Asked users to rate based on:
○ Visual appeal
○ Usability
○ Readability
○ Colour preference

(Reference: Your experiment structure matches the sample in)

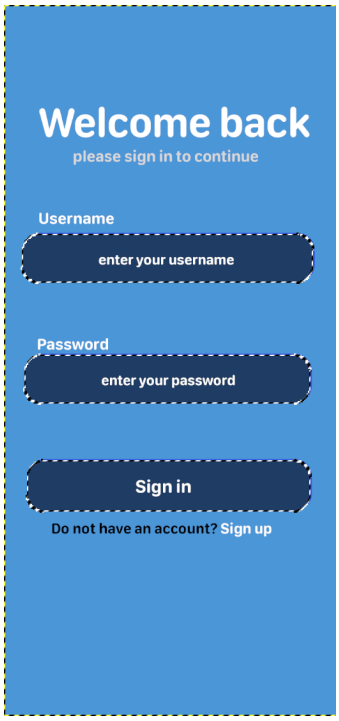
USER FEEDBACK:

Layout 1 (Red Theme):
• Bold and eye-catching design
• Good visibility of elements
• Slightly harsh on eyes due to strong colour
• Needs softer contrast

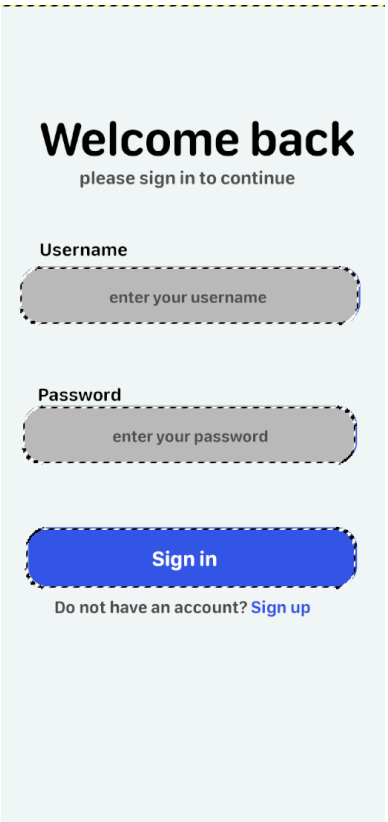


Layout 2 (Blue Theme):

- Visually appealing and modern
- Good colour combination
- Input fields blend slightly with background
- Improve spacing and contrast



Layout 3 (Light Theme):
• Clean and minimal design
• Best readability
• Professional look
• Well-balanced colours



FINAL RECOMMENDATION:

Preferred Layout: Layout 3

Reason:
• Clean and modern interface
• Easy readability
• Balanced colour usage
• Better user experience
• Most preferred by users

STEP 6: ITERATE AND REFINE

1. **Refinement:**
   • Improve button styling (add shadow or depth)
   • Adjust spacing between elements
   • Enhance contrast where needed
2. **Final Testing:**
   • Conduct another round of testing
   • Ensure usability and visual satisfaction

RESULT:

The experiment was successfully completed by designing three different login screen layouts using GIMP and evaluating them based on user feedback.

Among the three designs, **Layout 3 (Light Theme)** was found to be the most effective in terms of **usability, readability, and visual appeal**. Users preferred this layout due to its **clean interface, balanced colour scheme, and professional appearance**.

Thus, it is concluded that **minimal and well-spaced UI designs with soft colour combinations provide a better user experience compared to high-contrast or overly vibrant layouts.**
